Magazines, according to Wikipedia, are publications, usually periodical publications.

Magazines, according to Wikipedia, are publications, usually periodical publications, that are printed or published electronically. The online versions are called online magazines.

They are generally published on a regular schedule and contain a variety of content.

Magazines are generally financed by advertising, by a purchase price, by prepaid subscriptions.

The oldest consumer magazine still in print is The Scots Magazine, which was first published in 1739, though multiple changes in ownership and gaps in publication totaling over 90 years weaken that claim.

Magazine Distribution

Magazines can be distributed through the mail, through sales by newsstands, bookstores, or other vendors.

In the case of written publication, it is a collection of written articles. This explains why magazine publications share the word root with gunpowder magazines, artillery magazines, firearms magazines.

Fashion is just another accessory for someone with great style.
